

Coasters

Finished size: 4" x 4"

Each coaster requires 6 – 4-1/2" squares. Four will be the coaster top, one will be the coaster bottom and one will be the coaster lining.

1 Piece of fusible fleece 4" x 4"

All Seams are 1/4".

Fuse fleece centered to the bottom of the coaster.

Fold the 4 squares of fabric for the coaster top in half diagonally and press.

Layer as follows: Bottom of coaster right side down, lining right side up, then alternate triangles lining up right angles (raw edges) with folded edge towards center. When placing the last triangle, remember to put it under the first triangle.

I use clips to hold all layers in place so they don't get distorted by pins.

Sew around all 4 sides. Clip corners, turn, carefully poke out corners and press.

Coaster can be enjoyed with your beverage sitting atop coaster or it can become a portable coaster for a wine glass!
